

DeFiVault Protocol Tokenomics Design

Project Overview

Type: DeFi

Target Audience: both

Total Supply: 100,000,000 tokens

Token Allocations

Team: 15.0%

15,000,000 tokens - Core team allocation with long vesting
Vesting: 4-year linear vesting with 12-month cliff

Investors: 20.0%

20,000,000 tokens - Private and seed investor allocation
Vesting: 2-year linear vesting with 6-month cliff

Community: 30.0%

30,000,000 tokens - Community rewards and ecosystem growth
Vesting: 5-year emission schedule

Treasury: 25.0%

25,000,000 tokens - Treasury for development and partnerships
Vesting: On-demand unlocking via governance

Liquidity: 10.0%

10,000,000 tokens - DEX liquidity and market making
Vesting: Immediate unlock for liquidity provision

Economic Model & Narrative

This DeFi project features a balanced tokenomics model designed for both audience. The distribution ensures proper incentive alignment between stakeholders while maintaining healthy token circulation.

Key Risks

1. Market volatility
2. Regulatory uncertainty
3. Adoption challenges
